# New version of «PTSD-S - Posttraumatic Stress Disorder Scale»

Dear customers,

Updated version 2.0 of **«PTSD-S - Posttraumatic Stress Disorder Scale»** is now available in the EG CheckWare Store.

The update includes the following changes:
1. **Questionnaire:**
   - Reorganization of questionnaire pages.
   - Labels added to the outer response options for item 6.
   - Sub-items for items 4. and 6. are now labeled with letters (a., b., c., etc.) in line with the documentation guidelines.
   - Copyright statements have been revised for both regions.

2. **Report:**
   - Adjustments made to the report's appearance.
   - Report's visibility changed to clinician only.

3. **Calculations:**
   - Added calculations determining the total number of answered items and the percentage of items answered.
   - Items 6a through 6l were previously scored on a scale from 0 to 10 but should have been scored from 0 to 100. To maintain data continuity, **corrective -VALUE calculations** were applied (multiplying the response option value by 10). For further details, refer to the calculation codebook.

**Important!**
- PTSD-S can be updated manually by installing the new version (2.0) in the EG CheckWare Store.
- All respondents will get access to the new version (2.0) after it is installed. Note that all previously submitted PTSD-S questionnaires will still be registered with the older version 1.0.
- Assessment plans that contain PTSD-S and have already been started will include the older version of the questionnaire (1.0). All new assessment plans will contain the new version of PTSD-S (2.0).
- The update does not affect the PTSD-S data that have already been collected, i.e. you will not lose any data.

If you have any questions about the changes, please send them to support@checkWare.com

Best regards,
EG CheckWare AS
