

## New version of «TRAPS II - Traume- og PTSD-screening»

Dear customers,

Updated version 2.0 of «**TRAPS II - Traume- og PTSD-screening**» is now available in the CheckWare Store. This version of TRAPS II has recently been evaluated and approved by Nasjonalt kunnskapssenter om vold og traumatisk stress (NKVTS) that owns rights to the questionnaire.

The update includes the following changes:

1. **Questionnaire:**
  - SLESQ Items Inheritance: SLESQ items (Part 1) presented on the first page inherit previous answers from the last submission within a treatment. Respondents can change these previous answers. A note reflecting these two changes will appear at the top of the first page.
  - Conditional Visibility: Part 2 of the questionnaire becomes visible when any SLESQ question is answered 'Yes'.
  
2. **Report:**
  - Extended Score History: Scores from up to 30 latest submissions are now presented in graphs and summary tables, an increase from the previous limit of 6 submissions.
  - Baseline Scores: Baseline scores from the first submissions within a treatment are presented in both graphs and summary tables.
  - Change Flags: Flags will mark SLESQ questions where answers have changed since the last submission.
  - Graph Type Change: Total score graphs have been changed from bar charts to line graphs.
  
3. **Calculations:**
  - New Auxiliary Calculations: Additional calculations are added for assessment functioning. These are described in more detail in the codebook.

### Important!

- Increased Report Generation Time: Report generation time has increased. It is advisable to use TRAPS-II 2.0 on software version 4.11 or higher where the increase in time is reduced.
- Lock and Unlock Function: It is not recommended to use the lock and unlock function with this assessment.
- Flagging Changes: Report flags marking changes in SLESQ will reflect changes between version 2.0 assessment instances. Flags will not mark changes in SLESQ items between versions 1.0 and 2.0.
- TRAPS-II can be updated manually by installing the new version (2.0) in the CheckWare Store.
- All respondents will get access to the new version (2.0) after it is installed. Note that all previously submitted TRAPS-II questionnaires will still be registered with the older version 1.0.
- Assessment plans that contain TRAPS-II and have already been started will include the older version of the questionnaire (1.0). All new assessment plans will contain the new version of TRAPS-II (2.0).
- The update does not affect the TRAPS-II data that have already been collected, i.e. you will not lose any data.

If you have any questions about the changes, please send them to [support@checkware.com](mailto:support@checkware.com)

Best regards,  
EG CheckWare
